As rural communities face changes in local economies, populations, and workforce needs, what does the next generation of residents and workers value and want? That question was the motivation for the Rural Youth Futures project. Researchers and extension agents from several universities joined forces with local non-profits to find out what middle and high schoolers think in two forest-dependent regions: Coos County in Oregon and Piscataquis/Northern Somerset Counties in Maine. This is one in a series of fact sheets designed to present summary information to each participating school and county about the perceptions and aspirations of local youth.

Schools in rural communities are critical. They bring families together, support civic interaction, and foster workforce development. Schools also influence youth aspirations for future education. To learn more about these things in Coos County Schools, we asked students to tell us about their school experience and future goals, what they felt were barriers to those goals, and the extracurricular activities they participated in.

**How much do you agree or disagree with the following statements about your school?**

Increasing the number of young people and working families is a critical issue in many rural towns. Natural amenities and attachment to community can retain young people or attract in-migration. We asked students to tell us about their community to better understand what the community has to offer. We also asked them where they want to live in the future to see if there’s an interest in living in these places among young people.

How much do you agree or disagree with the following statements about your community:

- This is a good place to grow up:
  - Agree: 52%
  - Neither agree nor disagree: 27%
  - Disagree: 18%
  - Don’t know: 3%

- I care about my community:

Youth today are the community's future labor force. How prepared they feel, and how willing they are to work in local industries, influences their success in the workforce. We asked students to tell us about their career plans, including what barriers they may face and what training support they need. Because the outdoors is so important to our community, we also asked them about outdoor recreation activities that they participated in.

What would be your dream job when you are 30?

For this question, students could type in any answer to the question of what their dream job would be. We wanted to get a sense of their ideal career aspirations. All responses were entered into a program that generated this word cloud, where the larger and darker an entry is, the more times it was mentioned by students. Some students didn't name a particular job, but described in general what they hoped they'd be doing.

Do you think the following things will prevent you from getting the job you want?

Which of the following outdoor recreation activities have you done in the last year? (top ten):

- Visiting the beach (54%)
- Camping (48%)
- Hiking (47%)
- Canoeing or kayaking (31%)
- Wildlife viewing (30%)
- Fishing (29%)
- ATV riding (24%)
- Clamming/crabbing (22%)
- Golfing or frisbee/disc golf (20%)
- Recreating in the dunes (20%)

What sort of help would you like preparing for a job?

Percentage of students who agree or strongly agree with statements about their attachment to the outdoors (top two):

- They can be themselves in the outdoors here (77% of students)
- They feel happiest when in the outdoors here (55% of students)
